

TATIANA BARGA

UI/UX Designer and Developer

I have always had a deeply rooted need to create. Whether through painting, digital art, web design and development, interior design, or crocheting, I consistently seek to express myself and connect with others through my work. My passion for visual design and aesthetics drives me to craft experiences that are not only functional but also beautiful and impactful. I strive to bring thoughtful, cohesive design to every project. I'm constantly eager to explore new ventures—whether it's learning a new language, honing artistic skills, expanding my coding knowledge, or embracing any number of other challenges. I believe that continuously experiencing and learning new things, creating beautiful things, and contributing to a positive impact are key to living a fulfilling life.
